Uncovering the hidden benefits: your guide to applying soft start

Every motor system is unique, and successful motor control involves careful consideration of many factors to create the optimal solution. As well as maximising productivity and ensuring smooth operation, you also need to protect your equipment and integrate motor control more intelligently into your broader application.

Our decades of experience in applying soft start to motor control, and working with partners across a broad array of industries and applications, have shown us how soft start can provide very real benefits to applications in nearly every industry. We've pulled that knowledge together into this guide, helping you understand where applying soft start brings the most benefit.

Is there an industry we need to include? Please let me know, or provide any feedback you have on the existing quide.

Contents

M	Oil and gas 8
	Pulp and paper 9
A A A	Sawmilling 10
	Water treatment 11
	Water utilities

BUILDING SERVICES

BENEFIT		FEATURE	COMPRESSOR	ESCALATOR	FAN	PUMP	MOVING WALKWAY	
	Prevent damage due to reverse operation	Phase sequence						
	Prevent damage from ammonia fluid	Instantaneous					120	L. C. C.
Protect equipment	Prevent damage from misalignment of compressor screws	overcurrent			1/1	MAIN	Vii .	
equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop					The second	
	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent			N			
	Safely use full motor capacity without nuisance tripping	Matanthannalmadal						
Maximise productivity	Maximise operation during periods of high loading	─ Motor thermal model					PAR	
	Control compressor loading according to motor loading	Analog output				4 2 2	Mi	4 7 9
	Minimise stress on electrical supply	Reduced start current						
Smoother	Reduce mechanical stress during start							
operation	Smooth start for passengers	Gentle acceleration				1177	THE STATE OF THE S	All Logo Follows
	Minimise pressure surges					-		
Intelligent	Override motor and system protections in emergency situations eg fire pumps	Emergency run					8	1
control of the whole system	Simplify control circuits by directly connecting pressure switches	Digital inputs						

AUCom MOTOR CONTROL SPECIALISTS

FOOD & BEVERAGE APPLICATIONS

BENEFIT		FEATURE	AUGER	BLOWER/ FAN	CENTRIFUGE	COMPRESSOR	MILL, ROLLER	MIXER	PELLETISER	PUMP	SEPARATOR	SLICER	STIRRER
	Prevent damage due to reverse operation	Phase sequence											
Protect	Prevent damage from jammed loads	Instantaneous overcurrent											10-
equipment	Early warning of abnormal load conditions to detect broken couplings, blocked pipes etc	Undercurrent								•			
	Safely use full motor capacity without nuisance tripping	Motor thermal										Total S	
	Accurate motor protection during extended start	model							V				
Maximise productivity	Ride through operating overloads eg large bones or frozen goods	Overcurrent + delay										No.	
	Complete critical processes	PowerThrough											
	Control compressor loading according to motor loading									ap III	77	A	
	Control infeed conveyor speed based on motor loading	— Analog output									SA.		
Smoother	Minimise stress on electrical supply	Reduced start current										V.	
operation	Reduce mechanical stress during start	Gentle acceleration											
Intelligent control of the whole system	Simplify control circuits by directly connecting external switches	Digital inputs									-400		-
	Override motor and system protections in emergency situations, eg fire pumps, ventilation fans	Emergency run									4		
	Improve system performance with closed loop process control	Analog output								- 50			No.

IRRIGATION APPLICATIONS

BENEFIT		FEATURE	PUMP
	Prevent damage due to reverse operation	Phase sequence	
	Prevent damage from debris in water	Instantaneous overcurrent	-
Protect equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop	
1	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent	
	Extend life of pumps and pipes by protecting against extremes of pressure, depth or flow	Digital inputs	•
	Safely use full motor capacity without nuisance tripping	Motor thermal model	
Maximise productivity	Complete critical processes	PowerThrough	
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	Automate restarting after temporary disturbances	Auto reset	
	Minimise stress on electrical supply	Reduced start current	
Smoother operation	Reduce mechanical stress during start	— Gentle acceleration	
•	Minimise pressure surges	— Gentte acceteration =	
Intelligent control of the	Simplify control circuits by directly connecting pressure, depth and flow switches	Digital inputs	
whole system	Specify start and stop times	Auto-start/stop	
Reduce capital	Reduce infrastructure costs by using smaller supply transformers and pole fuses	 Reduced start current - 	•
cost	Start additional pumps using existing supply capacity	sadssa start carrent	

MARINE APPLICATIONS

BENEFIT		FEATURE	BLOWER/ FAN	BOW THRUSTER	COMPRESSOR	HYDRAULIC POWER PACK	PUMP	WINCH
	Prevent damage due to reverse operation	Phase sequence						
	Prevent damage from jammed loads	Instantaneous overcurrent						
Protect equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop						
	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent						
	Smooth take-up with gradual tensioning	Gentle acceleration						
Maximise	Safely use full motor capacity without nuisance tripping	Motor thermal model						
productivity	Complete critical processes	PowerThrough						
Smoother	Minimise stress on electrical supply	Reduced start current						
operation	Reduce mechanical stress during start	Gentle acceleration						
Intelligent	Override motor and system protections in emergency situations, eg fire pumps, ventilation fans	Emergency run	•	•			•	
ntelligent control of the whole system	Simplify control circuits by directly connecting pressure switches	Digital inputs						
·	Improve system performance with closed loop process control	Analog output						

MINING & QUARRYING APPLICATIONS

BENEFIT		FEATURE	AUGER	COMPRESSOR	CONVEYOR	CRUSHER	MILL	PUMP	VIBRATING SCREEN	
	Prevent damage due to reverse operation	Phase sequence								
	Prevent damage from jammed loads	Instantaneous overcurrent								
Protect	Minimise belt stretch and belt slap	Gentle acceleration								
equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop							1	2
	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent					10			1
	Safely use full motor capacity without nuisance tripping	Motor thermal						All		
	Maximise operation during periods of high loading	model							U jin is	
Maximise productivity	Complete critical processes	PowerThrough				1	N. C. C.			
	Start when loaded or unloaded	Current ramp						THE		-
	Control equipment loading according to motor loading	Analog output					-	1		
Smoother	Minimise stress on electrical supply	Reduced start current								
operation	Reduce mechanical stress during start	Gentle acceleration								1
Intelligent control of the whole system	Simplify control circuits by directly connecting pressure switches	Digital inputs				4				

AUCom MOTOR CONTROL SPECIALISTS

OIL & GAS APPLICATIONS

BENEFIT		FEATURE	BLOWER/FAN	CENTRIFUGE	COMPRESSOR	PUMP
	Prevent damage due to reverse operation	Phase sequence				
Protect	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop			116	
equipment	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent				+
	Prevent belt breakages	Gentle acceleration				
Maximise	Safely use full motor capacity without nuisance tripping	Motor thermal model				
productivity	Complete critical processes	PowerThrough				
	Minimise stress on electrical supply	Reduced start current				
Smoother operation	Reduce mechanical stress during start	— Gentle acceleration				
•	Minimise pressure surges	— Gentte acceteration			1	3 8
Intelligent	Simplify control circuits by directly connecting pressure switches	Digital inputs				
control of the whole system	Improve system performance with closed loop process control	Analog output			10/01	

PULP & PAPER APPLICATIONS

BENEFIT		FEATURE	BLOWER/ FAN	CHIPPER	PUMP	RE-PULPER	SHREDDER	STIRRER
	Prevent damage due to reverse operation	Phase sequence						
	Prevent damage from jammed loads	Instantaneous overcurrent						
Protect equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop						
	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent						
	Prevent belt breakages	Gentle acceleration						
	Safely use full motor capacity without nuisance tripping	Motor thermal model						_ //
Maximise productivity	Expedite replacement of cutting heads	Soft braking						100
	Complete critical processes	PowerThrough						
Smoother	Minimise stress on electrical supply	Reduced start current						
operation	Reduce mechanical stress during start	Gentle acceleration						
Intelligent control of the whole system	Simplify control circuits by directly connecting pressure switches	Digital inputs		•			•	

AUCom MOTOR CONTROL SPECIALISTS

SAWMILLING APPLICATIONS

BENEFIT		FEATURE	BANDSAW	BLOWER/ FAN	CHIPPER	CIRCULAR SAW	CONVEYOR	DEBARKER	EDGER	PLANER	SHREDDER	SLABBER	
	Prevent damage due to reverse operation	Phase sequence											1
Protect	Prevent damage from jammed loads	Instantaneous overcurrent						200		AM		V. W	
equipment	Prevent saw band stretch												
	Prevent blade misalignment at start	Gentle acceleration								-			
	Safely use full motor capacity without nuisance tripping	Motor thermal							27		4		MERITAL DE
	Maximise operation during periods of high loading	model					• 1					1	
	Expedite replacement of saw bands and chipper cutting heads	Soft braking / DC brake					-				4		Y
Maximise productivity	Assist alignment of newly fitted saw bands and blades	Jog									200		
	Start when unloaded and loaded	Current ramp							LASS	Letter.		对新产品	
	Complete critical processes	PowerThrough								But well the			
	Control infeed conveyor speed based on motor loading	Analog output											The table
Smoother	Minimise stress on electrical supply	Reduced start current				•		1	1				
operation	Reduce mechanical stress during start	Gentle acceleration								1	-		
Intelligent control of the whole system	Interface with metal detection equipment	Auxiliary trip											1
·									100			THE STATE OF THE S	1

WATER TREATMENT APPLICATIONS

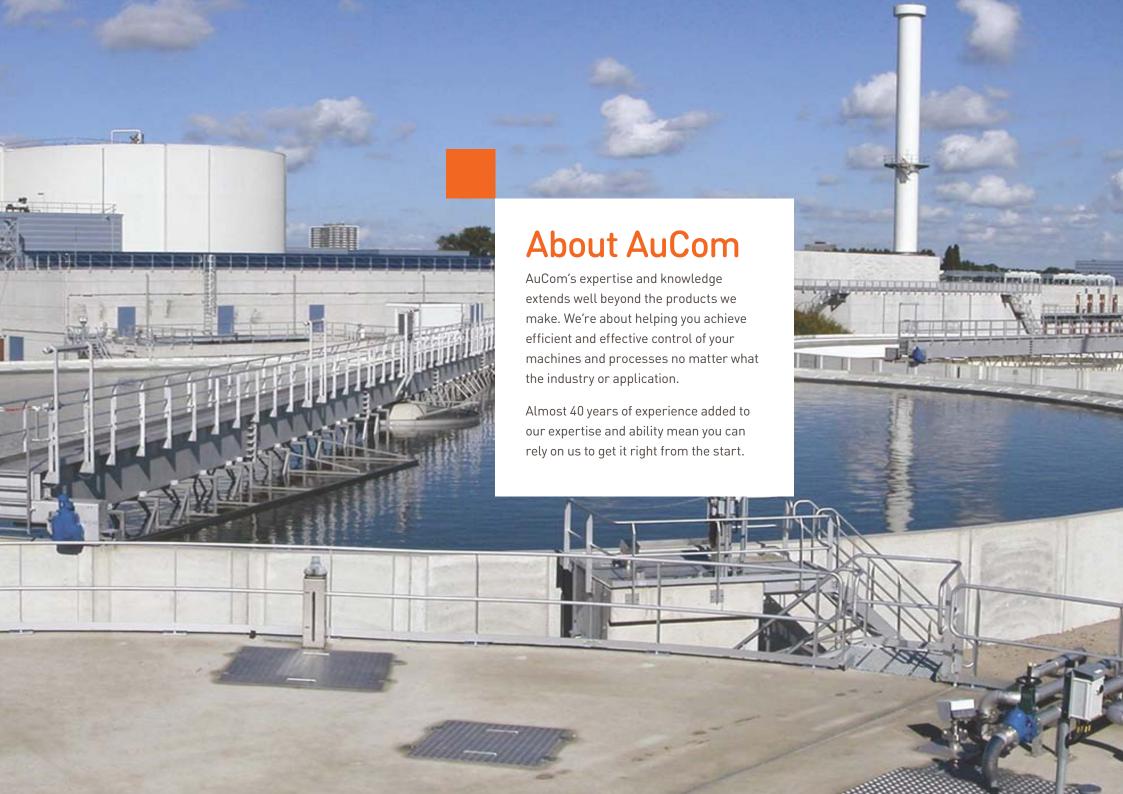

BENEFIT		FEATURE	AERATOR	BLOWER / FAN	MILLISCREEN	PUMP	SEPARATOR	P. S. S.	
	Prevent damage due to reverse operation	Phase sequence					The state of the s	Mira and	
	Prevent damage from debris in water	Instantaneous overcurrent				1			
Protect equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop					-	No. of Street, or other Persons	
	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent					- ora	Y	(1)
	Prevent chain breakages	Gentle acceleration					3/4		
Maximise	Safely use full motor capacity without nuisance tripping	Motor thermal model							
productivity	Complete critical processes	PowerThrough					-		
	Minimise stress on electrical supply	Reduced start current							
Smoother	Reduce mechanical stress during start								
operation	Minimise pressure surges	Gentle acceleration							
	Keep aerator stable during start	_							
Intelligent control of the whole system	Simplify control circuits by directly connecting pressure switches	Digital inputs					A SECOND		THE REPORT OF THE PARTY OF THE

WATER UTILITY APPLICATIONS

BENEFIT		FEATURE	MILLISCREEN	PUMP	SEPARATOR		
	Prevent damage due to reverse operation	Phase sequence				1 1 1 1 1	
	Prevent damage from debris in water	Instantaneous overcurrent					
Protect equipment	Prolong life of pumps, pipes, valves and headworks by preventing water hammer	Soft stop		-1			- L. 102
	Early warning of abnormal load conditions (broken couplings, blocked pipes etc)	Undercurrent					
	Prevent chain breakages	Gentle acceleration			7333	77	
Maximise	Safely use full motor capacity without nuisance tripping	Motor thermal model			Niz V		
productivity	Keep critical process running	PowerThrough					
	Minimise stress on electrical supply	Reduced start current				100	
Smoother operation	Reduce mechanical stress during start	Cantle acceleration				1111	
	Minimise pressure surges	— Gentle acceleration				1	
Intelligent control of the whole system	Simplify control circuits by directly connecting pressure switches	Digital inputs		•
